See the Stakeholder Health website as well - [great introduction](https://stakeholderhealth.org/el-paso/) by Gary to what is planned for El Paso: <https://stakeholderhealth.org/el-paso/>

Welcoming new Fellow - Bobby Milstein

Bobby Milstein, PhD, MPH, is Director of System Strategy for ReThink Health and the Rippel Foundation, as well as a Visiting Scientist at the MIT Sloan School of Management. With an educational background that combines cultural anthropology, behavioral science, and systems science, he concentrates on efforts to spark large-scale institutional change. He works with innovators who see themselves as system stewards, often equipping them with practical mindsets, models, and measures to understand their own scenarios for enhancing well-being and equity. He is a member of the National Academies Roundtable on Population Health Improvement, a co-founder of the Well Being in the Nation Network, and a trusted design consultant for new endeavors that strive to expand the dynamic and democratic dimensions of system stewardship. Previously, Bobby spent 20 years planning and evaluating system-oriented initiatives at the Centers for Disease Control and Prevention, where he was the principal architect of CDC's framework for program evaluation. He received CDC's Honor Award for Excellence in Innovation, as well as Article of the Year awards for papers published in Health Affairs and Health Promotion Practice. Outside of work Bobby practices photography, plays tennis, and cooks. He is married to Joanna Davidson, an anthropologist who studies political ecology and social transformation primarily in West Africa. Their daughter, Jasper, is a fiery redhead who is quick to step onto any stage; and their son, Zoly, is a clever joker with a shockingly long memory.

New LCL theory document, and website update

- Jim Cochrane has thoroughly rewritten the theory document - [Leading Causes of Life: An Integrative Idea](#). It's available on the website or just click on the above link for a PDF version!
- The website also has new material at '[El Paso Files](#)' and '[El Paso docs](#)' (click on links)'.
