[Click here for our YouTube channel with all available videos \(incl. long originals\).](#)

### Extra: thinking about climate change - Part II

### Climate Change & Religion: Politics, Perceptions & Radical Potentials

This video panel discussion at the Woolf Institute and the Faraday Institute for Science & Religion at Cambridge University that offers a lot to think about, some familiar, some not so, from a leading UK climate scientist, a scholar in Islamic Studies (both Cambridge, a political scientist (Copenhagen University), the Director of a Centre for Peace & Reconciliation, and a co-founder of Extinction Rebellion (UK), hosted by Dr Tobias Müller. It's about how we might respond, in the magnitude fitting to the scale of climate change that is predicted, in the face of a widespread sense of being "trapped in a 'crisis of imagination'." - *Warning: it's a long video, ca. 1¼ hrs, but worth sharing and watching.*

### Leading Causes of Life - Refreshed Website

Our website has been significantly updated with cleaner look and upfront, direct access to all currently available LCL/PD 'Flip to Life' videos. New Briefings are also now uploaded.
